PROFESSIONAL SUMMARY

Software Engineer with a Bachelor's degree in Software Engineering from Jordan University of Science and Technology (GPA 3.69, Dean's Honor List for four consecutive semesters). Experienced in building mobile and web applications across the full stack, from user interfaces to REST APIs and databases.

SKILLS

Languages: C++, Java, C#, Dart, JavaScript

Frameworks & Libraries: Flutter, React, Node.js, Express.js

Backend & Databases: PostgreSQL, RESTful API design, JSON Web Token (JWT) authentication, bcrypt, multi-tenant architecture, OpenAI API integration

Tools: Git, Postman

EXPERIENCE

Participant | 42 Amman, Cybersecurity | Oct 2026 – Dec 2026

- Practice Linux file management, permissions, and shell script execution through hands-on exercises.
- Apply Open-Source Intelligence (OSINT) techniques to investigate publicly available information and solve practical challenges.

Software Engineering Intern, Mobile Development (Flutter) | NeuroVerse | Jul 2026 – Oct 2026

- Built a Flutter mobile app for EduCore, a multi-tenant Learning Management System (LMS) with four user roles (teacher, student, parent, admin), integrated with a Node.js/Express and PostgreSQL backend.
- Implemented Admin flows with secret-code registration and role-based access control (RBAC) across the platform.
- Fixed a critical authentication bug by separating login and registration logic that had been merged in the auth service layer.
- Centralized API configuration into one reusable Dart class, replacing hardcoded URLs across 15+ files to simplify environment switching.
- Resolved Android build issues (JAVA_HOME setup, file-picker API compatibility) to unblock releases.
- Delivered Login and Courses screens and bug fixes based on iterative stakeholder feedback.

PROJECTS

Cognito, Adaptive IT Learning Platform (Graduation Project) | Mar 2026 – Jun 2026

React, Node.js, Express, PostgreSQL, OpenAI API

- Built a full-stack adaptive learning platform with 8 IT learning paths, each with its own roadmap, and two user roles (learner and admin), personalizing course content using React, Node.js, PostgreSQL and the OpenAI GPT-4o-mini API.
- Designed the backend architecture, database schema and REST API consumed by the React frontend.

EDUCATION

Bachelor of Software Engineering | Jordan University of Science and Technology (JUST) | 2026

- GPA: 3.69/4.00 | Dean's Honor List, 4 consecutive semesters

LANGUAGES

Arabic (Native) | English (Professional/Advanced)
